Detailed Breakdown of

the 2013 June Exam Questions Let's examine some typical questions from the 2013 June Paper 1, along with their explanations.

Sample Question 1: Multiple Choice Q: Which of the following best describes the process of deposition? A) The breaking down of rocks into smaller pieces B) The laying down of sediments carried by wind, water, or ice C) The movement of water over land D) The formation of mountains through tectonic forces

Memo Explanation: The correct answer is B. Deposition involves sediments being laid down or deposited by natural agents such as wind, water, or ice. This process is crucial in forming landforms like deltas, beaches, and alluvial fans.

Sample Question 2: Map Interpretation Q: Using the provided topographical map, identify the highest elevation point and explain how you determined this.

Memo Explanation: Students should look for contour lines with the highest elevation figures. The highest point is typically marked with a spot height or a summit symbol. For example, if the map shows a peak with a contour line labeled 1500 meters, that is the highest elevation. Students should mention the specific location and justify their choice based on contour interval and map symbols.

Sample Question 3: Short Answer Q: Explain the formation of a river valley.

Memo Explanation: A river valley forms through the process of erosion by flowing water. As the river moves, it erodes the land through hydraulic action, abrasion, and attrition, gradually carving out a valley. Over time, this results in features such as V-shaped valleys, especially in the youthful stages of a river. The process is influenced by factors like the gradient, rock type, and volume of water.
