Sample Practice Questions and Solutions

Question 1: Basic Arithmetic If a union worker earns \$20 per hour and works 40 hours a week, what is their weekly salary?

Solution: Weekly salary = hourly wage $\times$ hours worked = $\$20 \times 40 = \800

Question 2: Percentages A union member's dues are \$50 per month. If they receive a 10% discount, how much will they pay in dues after the discount?

Solution: Discount amount = 10% of \$50 = $0.10 \times \$50 = \5

New dues = \$50 - \$5 = \$45

Question 3: Ratios and Proportions The ratio of workers to supervisors in a union is 20:1. If there are 200 workers, how many supervisors are there?

Solution: Number of supervisors = total workers $\div$ ratio denominator = $200 \div 20 = 10$ supervisors

Question 4: Word Problem If a union's budget increases by 15% and the current budget is \$100,000, what will be the new budget?

Solution: Increase = 15% of \$100,000 = $0.15 \times \$100,000 = \$15,000$

New budget = \$100,000 + \$15,000 = \$115,000

Question 5: Data Interpretation A graph shows that 60% of union members voted in a recent election. If there are 1,200 members, how many votes were cast?

Solution: Votes cast = 60% of 1,200 = $0.60 \times 1,200 = 720$ votes
